*Performance Period: 4/1/2004-12/31/2004 | **Gross is supplemental

The performance quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the performance data quoted. Gross returns are shown as supplemental information and do not reflect the deduction of trading costs which are bundled with wrap fees. The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the US equity universe. It includes those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. The index is unmanaged, and does not reflect the deduction of expenses, which have been deducted from the Portfolio's returns. The index's return assumes reinvestment of all distributions and dividends; you cannot invest directly in an index.

INVESTMENT OBJECTIVE & STRATEGY

The Large Cap Growth Portfolio seeks to achieve a rate of return equal to or greater than the Russell 1000® Growth Index. Historically, large cap stocks have achieved a rate of return higher than bonds, money market accounts and certificates of deposits with less volatility than small or mid cap stocks.

The Large Cap Growth Portfolio invests primarily in companies valued at $10 billion or higher at the time of investment. Investments are chosen from a universe of securities passing Azzad's ethical screens. Emerald's strategy is relatively sector neutral. They seek to identify undervalued stocks that have already traded at a discount to their fair value. They combine a quantitative model with discounted cash flow analysis to score and rank stocks within the universe. They then apply a fundamental evaluation to confirm a stock's attractiveness.

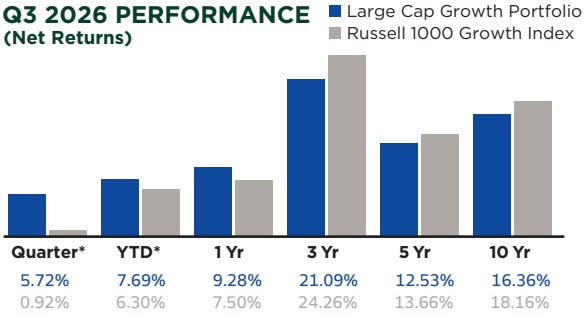

WHY LARGE CAP GROWTH STOCKS?

Large cap growth stocks are attractive for their potential to offer substantial capital appreciation while maintaining relative stability. These stocks represent well-established companies with market capitalizations typically over $10 billion, known for their strong growth prospects. They often operate in dynamic sectors such as technology, healthcare, and consumer goods, where innovation and market leadership drive revenue and earnings growth.

Investing in large cap growth stocks provides the dual benefits of growth potential and reduced risk compared to smaller cap stocks. These companies have proven business models, robust financial health, and the resources to invest in research, development, and expansion. Their established market presence reduces the risk of failure, making them a safer choice for growth-oriented investors.

Q3 2026 PERFORMANCE

(Net Returns)

	Quarter*	YTD*	1 Yr	3 Yr	5 Yr	10 Yr
Large Cap Growth Portfolio	5.72%	7.69%	9.28%	21.09%	12.53%	16.36%
Russell 1000 Growth Index	0.92%	6.30%	7.50%	24.26%	13.66%	18.16%

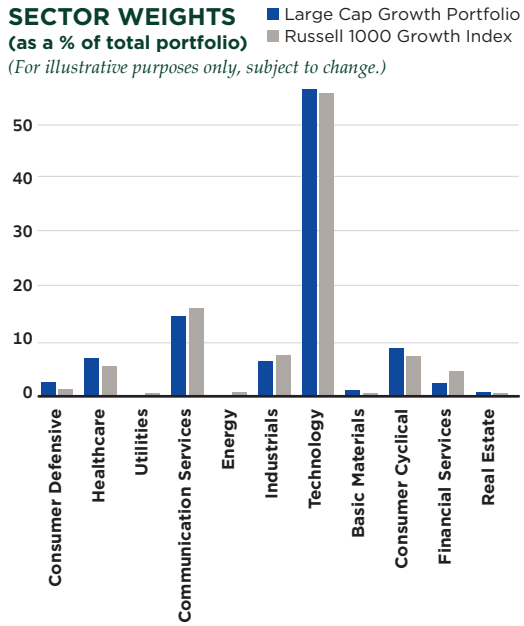

* Returns are not annualized. The performance is reported in US dollars. The performance quoted represents past performance, which does not guarantee future results. Performance inception date is 4/1/2004.

LARGE CAP GROWTH PORTFOLIO

CHRISTIAN GREINER, *CFA®, Senior Portfolio Manager*

Christian J. Greiner, CFA®, has been an active partner with the Azzad portfolio management team for over 10 years.

Christian is a Senior Portfolio Manager who provides fundamental research across all sectors and participates in the decision-making process for stock selection.

He has a substantial role in the quantitative research effort, contributing to the stock scoring model research. He has been responsible for developing a system that aggregates investment community sentiment towards individual stocks, and in the past has worked on quantitative tax-effective investment strategies, as well as long-short and other specialized strategies for the firm.

Christian holds a B.S. in Finance from DePaul University, as well as an M.B.A from the University of Chicago. Christian earned the Chartered Financial Analyst (CFA®) designation, and is a member of the CFA® Society of Chicago. Prior to joining the firm, he held positions with Checkfree Investment Services and Northern Trust.

HISTORY OF MANAGER

Emerald Investment Advisers is an investment firm providing investment strategies to advisors and institutional investors across asset classes, markets, and styles.

They believe that putting long-tenured, experienced investment teams in an environment that encourages collaboration is critical to producing the results that clients demand.

As of June 2026, Emerald managed $10.1* billion in assets.

EMERALD ADVISERS, LLC

** Estimated. Total assets combine both Assets Under Management and Assets Under Advisement for Emerald Advisers, LLC, Emerald Mutual Funds Advisers Trust and Emerald Investment Advisers, LLC. Assets Under Management represent the aggregate fair value of all discretionary and non-discretionary assets, including fee paying and non-fee paying portfolios. Assets Under Advisement represent advisory-only assets where the firm provides a model portfolio and does not have trading authority over the assets.*

Investing involves risk, including the possible loss of principal. Please read the following important disclosures.

Investing in large cap stocks could fall out of favor and returns would subsequently trail returns from the overall stock market. Investing in dividend yielding stocks could fall out of favor and returns would subsequently trail returns from the overall stock market.

Moreover, to the extent that a portfolio favors a growth style, the risk is that the values of growth securities may be more sensitive to changes in current or expected earnings than the values of other securities. To the extent a portfolio uses a value style, the risk is that the market will not recognize a security's intrinsic value for a long time, or that a stock judged to be undervalued may actually be appropriately priced.

Investments in securities involve risks and there is no guarantee that a strategy will achieve its objectives. As with all stock investments, you may lose money investing in this portfolio. Azzad's portfolios generally avoid companies in certain economic sectors and businesses due to Azzad's socially responsible investment restrictions. Therefore, their performance may suffer if these sectors and/or businesses outperform the overall stock market.

Each portfolio is nondiversified and may invest a larger percentage of its assets in fewer companies exposing it to more volatility and/or market risk than a diversified portfolio. Each portfolio is generally available only through one of Azzad's asset allocation strategies and is not designed by itself to be a comprehensive, diversified investment plan.

All of Azzad's models are actively managed. Active trading of securities may increase your account's short-term capital gains or losses, which may affect the taxes you pay. Short-term capital gains are taxed as ordinary income under federal income tax laws.

When reviewing your actual performance, holdings and asset allocation, note that different accounts, even though they are traded pursuant to the same strategy, can have varying results. The reasons for this include: i) the period of time in which the accounts are active; ii) the timing of contributions and withdrawals; iii) the account size; iv) the minimum investment requirements and/or withdrawal restrictions; and v) the actual fees charged to an account. There can be no assurance that an account opened by any person will achieve performance returns similar to those provided herein.

You should consider investing in the Ethical Wrap Program if you are looking for long-term returns and are willing to accept the associated risks. The Ethical Wrap Program is made available through a Wrap Brochure which contains important information about our firm, strategies, risks and conflicts of interest. Please request a copy of our Wrap Brochure, Part 2A of the firm's Form ADV, and your representative's Part 2B by calling 888.862.9923 before investing in the Wrap Program or opening an account with us.
